# **Data Quality Report After PreProcessing**

### **Initial Data Shape**

The data initially had 536641 rows and 9 columns.

### **Missing Data**

InvoiceNo 0

StockCode 0

Description 1454

Quantity 0

InvoiceDate 0

UnitPrice 0

CustomerID 135037

Country 0

Active 0

dtype: int64

As we have a huge dataset, instead of treating missing data, we are directly dropping the rows containing missing values.

#### **Inconsistent Data**

We removed 35425 rows where the 'StockCode' contained alphabets or special characters to ensure only numeric values remain.

#### **Incorrect Data**

Number of CustomerIDs marked as both Active and Inactive: 1878

We removed 272993 rows where CustomerIDs had conflicting active/inactive statuses.

# **Data Quality Report After PreProcessing**

## **Preprocessed Data Shape**

After all preprocessing, the dataset now has 93186 rows and 9 columns.
